

HIGHWAY SURVEYS

WE WORK WORLDWIDE

EXPERIENCE

Merrett Survey Limited has worked across all types of road survey, for new build, improvements, widening schemes, asset inventory and maintenance, in all regions of the UK and around the World. This has included all grades of road from motorways, dual carriageways, bypasses, urban, rural and gravel roads across Africa. We have even surveyed a road made of coral in the Philippines !

WE USE THE LATEST TECHNOLOGY

Merrett Survey can deploy mobile laser scanning solutions Nationwide. Large data sets can be collected rapidly and to a high accuracy with precise ground control points

Our survey team also use the latest terrestrial laser scanning technology, GPS and non-contact total stations.

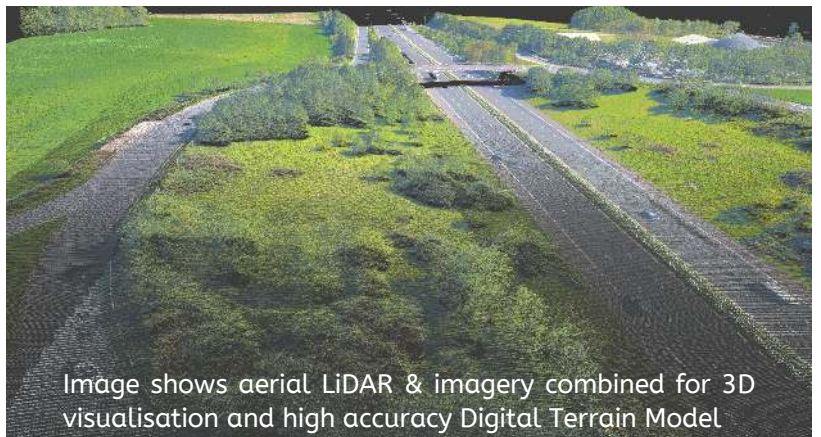

Image shows aerial LiDAR & imagery combined for 3D visualisation and high accuracy Digital Terrain Model

CAD OUTPUTS

Our experienced CAD team can output data to meet your specification. Typically, data is output in 3D AutoCAD or MicroStation models. Bentley MX Models are also produced for road and highway design.

Our 3D outputs comply with IAN 184/14 – Highways Agency Data & CAD Standard.

TESTIMONIAL

Merretts have shown themselves to be technically very capable, providing a positive approach.
-Ordnance Survey
